Education

Southern University of Science and Technology (SUSTech) Shenzhen, China

M.Sc. in Electronic Science and Technology; **GPA: 3.74/4.00; Weighted Score: 92.61;** *Sept. 2023 – Jul. 2026*

B.Sc. in Communication Engineering; **GPA: 3.77/4.00; Weighted Score: 90.6;** *Sept. 2019 – Jul. 2023*

Supervised by Prof. Rui Wang (Editor of IEEE WCL, IEEE OJ-COMS), I focus on **the experimental study of passive UAV trajectory tracking via Cellular downlink signals and mmWave sensing channel modeling for wireless sim2real gesture recognition.**

Experience

Beijing ZengYi HuiChuang Technology Co., Ltd. (NI's Official Partner) Shenzhen, China

Research Intern *Aug. 2022 – Sept. 2022*

- Working on wireless communication combined with artificial intelligence (AI).
- Mainly helped the company advance a project on modulating signal recognition based on USRP, using neural networks to achieve high recognition accuracy of the signals with different modulation modes. Internship Certificate: [PDF].

Awards & Achievements

- 2023∼2024 Southern University of Science and Technology **Outstanding Graduate Students Award**.
- **Leader** for Guangdong University Students' Science and Technology Innovation Cultivation Special Fund ("Climbing Plan" Special Fund), 2024∼2025 **(Funding: 20,000 RMB)**.
- 2023 Southern University of Science and Technology Graduate Academic **Grand-Class** Scholarship.
- **Second Prize** in the 17th "Challenge Cup" Guangdong University Student Extracurricular Academic Science and Technology Works Competition, 2023.
- 2023 **Excellent Graduate of Undergraduate** for exceptional performance in the Department of Electronic and Electrical Engineering, SUSTech.

- 2021∼2022 Southern University of Science and Technology Outstanding Student **Third-Class** Scholarship.
- **Leader** for Guangdong University Students' Science and Technology Innovation Cultivation Special Fund ("Climbing Plan" Special Fund), 2021∼2022 **(Funding: 15,000 RMB)**.
- **Third Prize** (as team leader) in the Guangdong Division of the National Undergraduate Electronics Design Contest, 2021.

Skills

Outstanding Courses (research-related): Computer Networks (Grade: 97 (A+)); Design of Modern Communication System (Grade: 98 (A+), Rank: 1/30); Antennas and Radio Propagation (Grade: 100 (A+), Rank: 1/40); Information Theory and Coding (Grade: 99 (A+)); Communication Principles (Grade: 95 (A)); Data Structures and Algorithm Analysis (Grade: 99 (A+)); Wireless Network and Mobile Computing (Grade: 96 (A+)); Fundamentals of Wireless Communications (Grade: 95 (A)); Sensors and Applications (Grade: 100 (A+)).

Programming Languages: Python, MATLAB, C/C++, Java

Technologies: PyTorch, Linux/Ubuntu, Git/GitHub, UHD/USRP, 60GHz Sivers

Writing: LaTeX, Markdown, Website (HTML, CSS, JavaScript)

English: CET-4, CET-6

Projects

Experimental Study on Passive UAV Trajectory Tracking via LTE Downlink Signals | Dataset

- A Doppler-only multistatic passive unmanned aerial vehicles (UAVs) tracking system utilizing downlink long-term evolution (LTE) signals. The performance of UAV trajectory tracking is demonstrated by experiments on a low-altitude two-dimensional plain.
- Our experiments demonstrated that the tracking errors are below 50cm for 90% of the trajectory, when the distance between the UAV and sensing receivers is below 30m.

Simulation Meets Reality in Wireless Channel (CASTER) | Paper | GitHub | Project Page

- An open-source platform for wireless channel simulation, human/hand pose extraction, gesture spectrogram generation, and real-time gesture recognition based on millimeter-wave passive sensing and communication systems.
