## EDUCATION

### Southern University of Science and Technology (SUSTech)

Shenzhen, China

*M.Sc. in Electronic Science and Technology*; GPA: 3.74/4.00; **Rank: 2/50, Top 5%**

*Sept. 2023 – Jul. 2026*

*B.Sc. in Communication Engineering*; GPA: 3.77/4.00; **Rank: 6/33**

*Sept. 2019 – Jul. 2023*

Supervised by Prof. [Rui Wang](#) (Editor of IEEE WCL, IEEE OJ-COMS), I focus on **the experimental study of passive unmanned aerial vehicle (UAV) trajectory tracking via LTE downlink signals (Second-year graduate research) and sensing channel modeling (First-year graduate research).**

## EXPERIENCE

### Beijing ZengYi HuiChuang Technology Co., Ltd. (NI's Official Partner)

Shenzhen, China

*Research Intern*

*Aug. 2022 – Sept. 2022*

- Working on wireless communication combined with artificial intelligence (AI).
- Mainly helped the company advance a project on modulating signal recognition based on USRP, using neural networks to achieve high recognition accuracy of the signals with different modulation modes. Internship Certificate: [\[PDF\]](#).

## AWARDS & ACHIEVEMENTS

- 2023~2024 Southern University of Science and Technology **Outstanding Graduate Students Award**.
- Leader** for Guangdong University Students' Science and Technology Innovation Cultivation Special Fund (“Climbing Plan” Special Fund), 2024~2025 (**Funding: 20,000 RMB**).
- The Excellent Graduate Teaching Assistant for the Fall Semester in 2023.
- Core Member** for Guangdong University Students' Science and Technology Innovation Cultivation Special Fund (“Climbing Plan” Special Fund), 2023~2024 (**Funding: 20,000 RMB**).
- 2023 Southern University of Science and Technology Graduate Academic **Grand-Class** Scholarship.
- Second Prize** in the 17th “Challenge Cup” Guangdong University Student Extracurricular Academic Science and Technology Works Competition, 2023.

- 2023 **Excellent Graduate of Undergraduate** for exceptional performance in the Department of Electronic and Electrical Engineering, SUSTech.
- **Core Member** for Guangdong University Students' Science and Technology Innovation Cultivation Special Fund ("Climbing Plan" Special Fund), 2022~2023 (**Funding: 20,000 RMB**).
- 2021~2022 Southern University of Science and Technology Outstanding Student **Third-Class** Scholarship.
- Performed **exceptionally well** and contributed significantly to the research and development of the projects during the internship at **Beijing ZengYi HuiChuang Technology Co., Ltd. (NI's Official Partner)** in August, 2022. The outstanding performance certificate is here: [\[PDF\]](#).
- **Core Member** for Guangdong University Students' Science and Technology Innovation Cultivation Special Fund ("Climbing Plan" Special Fund), 2021~2022 (**Funding: 20,000 RMB**).
- **Leader** for Guangdong University Students' Science and Technology Innovation Cultivation Special Fund ("Climbing Plan" Special Fund), 2021~2022 (**Funding: 15,000 RMB**).
- **Third Prize** (as team leader) in the Guangdong Division of the National Undergraduate Electronics Design Contest, 2021.

## SKILLS

---

**Outstanding Courses (research-related):** Computer Networks (Grade: 97 (A+)); Design of Modern Communication System (Grade: 98 (A+), Rank: 1/30); Antennas and Radio Propagation (Grade: 100 (A+), Rank: 1/40); Information Theory and Coding (Grade: 99 (A+)); Communication Principles (Grade: 95 (A)); Data Structures and Algorithm Analysis (Grade: 99 (A+)); Wireless Network and Mobile Computing (Grade: 96 (A+)); Fundamentals of Wireless Communications (Grade: 95 (A)); Sensors and Applications (Grade: 100 (A+)).

**Programming Languages:** Python, MATLAB, Java

**Technologies:** PyTorch, Linux/Ubuntu, Git/GitHub, UHD/USRP, 60GHz Sivers

**Writing:** L<sup>A</sup>T<sub>E</sub>X, Markdown, Website (HTML, CSS, JavaScript)

**English:** CET-6

## PROJECTS

---

**Experimental Study on Passive UAV Trajectory Tracking via LTE Downlink Signals** | [Dataset](#)

- A Doppler-only multistatic passive unmanned aerial vehicles (UAVs) tracking system utilizing downlink long-term evolution (LTE) signals. The performance of UAV trajectory tracking is demonstrated by experiments on a low-altitude two-dimensional plain.
- Our experiments demonstrated that the tracking errors are below 50cm for 90% of the trajectory, when the distance between the UAV and sensing receivers is below 30m.
- **Note: Detailed information of this project and related paper will be available after the paper acceptance.**

**Simulation Meets Reality in Wireless Channel (CASTER)** | [Paper](#) | [GitHub](#) | [Project Page](#)

- An open-source platform for wireless channel simulation, human/hand pose extraction, gesture spectrogram generation, and real-time gesture recognition based on millimeter-wave passive sensing and communication systems.

## EXTRACURRICULAR ACTIVITIES

---

- |                                                                                    |                             |
|------------------------------------------------------------------------------------|-----------------------------|
| • Teaching Assistant for Design of Modern Communication Systems (EE312) in SUSTech | <i>2025 Spring Semester</i> |
| • Teaching Assistant for Wireless Communications (EE313) in SUSTech                | <i>2024 Fall Semester</i>   |
| • Teaching Assistant for Design of Modern Communication Systems (EE312) in SUSTech | <i>2024 Spring Semester</i> |
| • Teaching Assistant for Wireless Communications (EE313) in SUSTech                | <i>2023 Fall Semester</i>   |
