EDUCATION

Southern University of Science and Technology (SUSTech)

Shenzhen, China

M.Sc. in Electronic Science and Technology; GPA: 3.74/4.00; Weighted Score: 92.61; B.Sc. in Communication Engineering; GPA: 3.77/4.00; Weighted Score: 90.6;

Sept. 2023 – Jul. 2026 Sept. 2019 – Jul. 2023

Supervised by Prof. Rui Wang (Editor of IEEE WCL, IEEE OJ-COMS), I focus on the experimental study of passive UAV trajectory tracking via Cellular downlink signals and mmWave sensing channel modeling for wireless sim2real gesture recognition.

EXPERIENCE

Beijing ZengYi HuiChuang Technology Co., Ltd. (NI's Official Partner)

Shenzhen, China Aug. 2022 – Sept. 2022

Research Intern

- Working on wireless communication combined with artificial intelligence (AI).
- Mainly helped the company advance a project on modulating signal recognition based on USRP, using neural networks to achieve high recognition accuracy of the signals with different modulation modes. Internship Certificate: [PDF]. The outstanding performance certificate is here: [PDF].

AWARDS & ACHIEVEMENTS

- 2023~2024 Southern University of Science and Technology Outstanding Graduate Students Award.
- Leader for Guangdong University Students' Science and Technology Innovation Cultivation Special Fund ("Climbing Plan" Special Fund), 2024~2025 (Funding: 20,000 RMB).
- 2023 Southern University of Science and Technology Graduate Academic Grand-Class Scholarship.
- Second Prize in the 17th "Challenge Cup" Guangdong University Student Extracurricular Academic Science and Technology Works Competition, 2023.

- 2023 Excellent Graduate of Undergraduate for exceptional performance in the Department of Electronic and Electrical Engineering, SUSTech.
- 2021~2022 Southern University of Science and Technology Outstanding Student Third-Class Scholarship.
- Leader for Guangdong University Students' Science and Technology Innovation Cultivation Special Fund ("Climbing Plan" Special Fund), 2021~2022 (Funding: 15,000 RMB).
- Third Prize (as team leader) in the Guangdong Division of the National Undergraduate Electronics Design Contest, 2021.

SKILLS

Outstanding Courses (research-related): Computer Networks (Grade: 97 (A+)); Design of Modern Communication System (Grade: 98 (A+), Rank: 1/30); Antennas and Radio Propagation (Grade: 100 (A+), Rank: 1/40); Information Theory and Coding (Grade: 99 (A+)); Communication Principles (Grade: 95 (A)); Data Structures and Algorithm Analysis (Grade: 99 (A+)); Wireless Network and Mobile Computing (Grade: 96 (A+)); Fundamentals of Wireless Communications (Grade: 95 (A)); Sensors and Applications (Grade: 100 (A+)).

Programming Languages: Python, MATLAB, C/C++, Java

Technologies: PyTorch, Linux/Ubuntu, Git/GitHub, UHD/USRP, 60GHz Sivers

Writing: LATEX, Markdown, Website (HTML, CSS, JavaScript)

English: CET-4, CET-6

Projects

Experimental Study on Passive UAV Trajectory Tracking via LTE Downlink Signals | Dataset

- A Doppler-only multistatic passive unmanned aerial vehicles (UAVs) tracking system utilizing downlink long-term evolution (LTE) signals. The performance of UAV trajectory tracking is demonstrated by experiments on a low-altitude two-dimensional plain.
- Our experiments demonstrated that the tracking errors are below 50cm for 90% of the trajectory, when the distance between the UAV and sensing receivers is below 30m. If the initial location of the UAV is unknown, by adding a new receiver and solving a minimum mean-squared error optimization problem, the complicated trajectories can be tracked with 90% errors below 90 cm.

Simulation Meets Reality in Wireless Channel (CASTER) | Paper | GitHub | Project Page

• An open-source platform for wireless channel simulation, human/hand pose extraction, gesture spectrogram generation, and real-time gesture recognition based on millimeter-wave passive sensing and communication systems.
